FLAME RESISTANT

ARC RATED / UL CERTIFIED WORKWEAR

NFPA 2112

NFPA 2112 Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire provides minimum requirements for the design, construction, evaluation and certification of flame resistant garments. The standard was developed to protect industrial workers, primarily in oil, petrochemical and manufacturing industries. Flash fires are unplanned exposures that typically last three seconds or less and spread rapidly through combustible dust, gas or vapors of an ignitable liquid. The standard does not cover fire entry or structural fire fighting activities and provides no personal protection from chemical exposures.

NFPA 70E

NFPA 70E standard addresses electrical Arc hazards in the workplace and was developed to protect electrical workers who work on or near equipment that is capable of generating an Arc flash. Employers are required to complete their own testing to assess each workers Arc hazard exposure rating. The level of Arc exposure is referred to as the Arc Thermal Performance Value (ATPV) or cal rating. These ratings are used in the chart below to help determine the best personal protective equipment each worker should use. Each garment should be clearly marked for which Flash PPE Category it complies with.

CAT RATING // PROTECTIVE CLASSIFICATION	
ARC FLASH CATEGORY	REQUIRED MINIMUM ATPV VALUE (CAL/CM ²)
1	4
2	8
3	25
4	40

This chart, based on specific job tasks, ranges from Cat.1 (low risk) to Cat.4 (high risk) and requires FR clothing with a minimum Cat. rating of 4. The Cat. category is used to determine the necessary Cat. rating of a garment worn during a given job task. Each of our garments are labeled with the appropriate Cat. rating they meet.

ANSI CERTIFIED

The ANSI/ISEA 107 American National Standard for High-Visibility Safety Apparel and Accessories is a voluntary standard with guidelines that provide practical instruction regarding both reflective material and garment design to enhance worker visibility. ANSI/ISEA 107 presents three performance classes of garments and identifies garment types based on expected use settings and work activities being performed.

ANSI TYPE R

Type R offers a Performance Class 2 and Class 3 – garments specifically designed for use on roadways – and is often the choice of other construction and transportation applications due to the high presence of moving vehicles and equipment.

ANSI CLASS 2 & 3

ANSI certifications are designed for garments intended for activities where greater visibility is necessary during inclement weather. It also covers workers who perform tasks that divert their attention from approaching traffic or puts them in close proximity to vehicles traveling 25 mph or higher.

ANSI TYPE E

Applies to retro-reflective equipped pants or shorts, designed to be worn in combination with either Class 2 or Class 3 tops. When worn in this manner, the ensemble is rated as Performance Class 3. When worn alone they do not meet any of the ANSI class requirements.

EN ISO CERTIFIED

The EN ISO Standard for High-Visibility Safety Apparel and Accessories is a voluntary standard with guidelines that provide practical instruction regarding both reflective material and garment design to enhance worker visibility. EN ISO presents performance classes of garments and identifies garment types based on expected use settings and work activities being performed.

WOMEN'S FIT GUIDE

- BUST:** Measure around your chest at the fullest point. Make sure the tape stays horizontal while measuring.
- WAIST:** Measure around your natural waist. Find this by bending to the side - where the dip is, is your natural waist.
- HIGH HIP:** Measure around your hips 3" below your waist or 2" below your belly button.
- LOW HIP:** Measure around the fullest part of your hips when standing with your feet 6-8" apart.
- INSEAM:** Measure from the top of your leg to below the ankle bone with your feet 6-8" apart.

- 3/4" longer for short sleeves

LOGO GUIDELINES

These guidelines explain and illustrate the use of the Cat logo as it relates to advertising. The Cat logo must be used properly.

Cat Flag Logo Application

The trademark artwork may be reproduced in two color or reverse. For two color reproduction, the yellow field must be matched to the Caterpillar Corporate Yellow. For reverse, the logo may only be displayed as a white logotype with black background.

Color Builds

CMYK (Gloss) 0-29-100-0 CMYK (Matte) 0-23-100-0

Legal Line

The legal line needs to go on all advertising and marketing materials unless otherwise noted.

WWW.CAT.COM | WWW.CATERPILLAR.COM
©2023 SRI APPAREL LIMITED. CAT, CATERPILLAR, THEIR RESPECTIVE LOGOS, CATERPILLAR YELLOW, THE POWER EDGE TRADE DRESS AS WELL AS CORPORATE AND PRODUCT IDENTITY USED HEREIN, ARE TRADEMARKS OF CATERPILLAR AND MAY NOT BE USED WITHOUT PERMISSION.

Prohibited Uses

- Never create variations or alternate versions of the trademark including, but not limited to, outlines of marks, marks with drop shadows, or gradient color.
- Do not use redrawn or poorly reproduced design marks.
- Do not alter the shape or proportions of the design marks.
- Never display the design mark at an angle or vertically.
- Never use the design mark in any type of animation, or add effects to give the appearance of animation.
- Never combine the trademarks with any other logo, symbol, mark or text.
- Never trivialize the trademark by using repetitively or as decoration.

Other Prohibited Uses

Do not add type to alter the logo

Do not recreate logos

Do not change box proportions

Do not add screen tints

Do not add objects or elements to logos

Follow these Rules for Backgrounds

- Place the flag logo in a corner of the image ensuring that it stands alone.
- Do not combine the logo with any other text or graphic.
- Place the logo over a photograph in an area that provides no visual disruption.
- Always make sure there is sufficient contrast between the logo and the background.

Incorrect placement of logo

Correct placement of logo

SUBMISSION PROCESS

Anything bearing the Cat® or Caterpillar® name or trademark or anything pertaining to Caterpillar business must be approved prior to production.

Submit Artwork and Items to:

Summit Resource International, LLC / Cat Apparel Co-op
Attn: Sales Department
2310 University Way, Suite 3-1
Bozeman, MT 59715

Customer Service Contact Information

Phone: 866-930-4CAT (4228)
Fax: 406-922-1101

Email
CatProg.coop@sri-a.com

Items to be Included:

Submission should include layout of the advertisement, dimensions, name or location of intended publication or medium, recent copy of proposed publication and production sample.

CLAIMS PROCESS

- Reimbursement is determined by the space allocated to Cat Apparel.
- Acceptable Proof of Performance/Documentation includes newspaper invoices, tear sheets, copy of inserts, catalogs, circulars or mailer, printing invoices indicating quantity and cost, insertion invoices, mailing receipts/proof of distribution and manufacturers' invoices.

CO-OP GUIDELINES

- Accruals are based on 2% of 1st quality net shipments (non-discounted products only) from January 1, 2024 through December 31, 2024.
- Purchases of off-price merchandise, including irregulars, closeouts, seconds or special purchase merchandise are not eligible for co-op reimbursement.
- Deduction off of invoice is not allowed.
- Advertisements featuring a price or discount below MAP (Minimum Advertised Price) pricing policies will make the entire advertisement ineligible for co-op reimbursement. For a list of MAP prices, please refer to your price list.
- Summit Resource International will reimburse 50% of qualified advertising costs for Cat apparel products up to the limit of your earned accruals.
- Advances on co-op funds are not allowed. Co-op accrual monies must be earned before they are paid.
- Co-op claims must be submitted within 60 days of the ad run date.
- Co-op funds do not carry over into the following year.
- Customer account must be in good standing to qualify for reimbursement.
